### Supervisor/Co-Supervisor Comments

Please comment on the following:

- a. The strengths and competencies of the applicant (i.e., why have you chosen to recruit this individual).
- b. The research environment in which the applicant's project will be conducted.

Please be aware, to mitigate unconscious gender bias, it is strongly recommended that you:

- Be attentive to the potential for unconscious bias in the language you use to describe the applicant. For example, research has shown that women applicants are more likely to be described using “grindstone” words that emphasize effort (e.g., hard-working) while men are more likely to be described using words that emphasize their accomplishments.

For a quick reference guide to avoiding gender bias in writing, consider using [this guide](#).

### **The strengths and competencies of the applicant (i.e., why have you chosen to recruit this individual)**

2500 characters

### **The research environment in which the applicant's project will be conducted.**

Describe the facilities, equipment and personnel support that will be available to the applicant, including the details regarding researcher interaction. How will the applicant be supported in their development as a researcher? How will the award impact the environment at the host institution?

2500 characters

### **Your previous experience as a supervisor for trainees**

Briefly describe your previous experience supervising and training students and/or postdoctoral fellows.

1250 characters

Briefly describe your previous experience supervising and training students and/or postdoctoral fellows.

### **Professional development and training of the applicant**

Briefly describe the professional development and training plan for the applicant while they are conducting their fellowship under your supervision. What new skills, professional experiences and training may be acquired? How will the fellowship ready them for the next stage of their research career?
