Career Timeline

Date of Degree Completion

10/01/2018

Have you experienced any career interruptions?

Yes

Number of Career Interruptions

Two

Career Interruption 1

Career Interruption Start Date: 01/01/2019

Career Interruption End Date: 03/15/2019

Interruption Duration in Months: 2

Career Interruption Description: Parental Leave

Career Interruption 2

Career Interruption Start Date: 02/11/2020

Career Interruption End Date: 06/19/2020

Interruption Duration in Months: 4

Career Interruption Description: Other

Please Specify the Type: Moving to Canada

Prior Career Interruptions

Prior Career Interruptions

If you had any career interruptions prior to the completion of your PhD or health professional degree, please provide the dates and describe the nature of the interruptions here. Examples of eligible career interruptions are parental leave, medical leave, residency training, etc.

These career interruptions will not be included in the award eligibility calculation, but may be used during the Peer Review process to evaluate your application.

Research Project

Project Information

Project Title

My Project Title

Lay Summary

Please provide a brief plain-language summary of your research project including the problem the project will address, an overview of the research itself, and the anticipated outcomes and potential impact on understanding, care provision, and the BC health system.

The summary must be written in a way that a non-specialist and non-scientific audience can understand. It is an integral part of your funding application, and if successful will be posted to the MSFHR website and used to share information about the valuable research supported by public funds.

For guidance on writing plain language summaries, please see our [KT Encounters blog](#) (click here) from health literacy researcher Iva Cheung. The MS Society of Canada also has a useful guide for writing lay summaries (click here).

Scientific Summary

The summary should provide an abstract that is understandable by a multi-disciplinary group of scientific reviewers. Summarize the objectives and their relevance to the work proposed in the research project providing the reviewers with the central key question being studied and related research activities. If you are submitting an application that is fully focused on KT science, the scientific summary must reflect the KT science focus. The Scientific Summary may be used to identify appropriate peer reviewers for your application.
